

March 2011: **Customized Akashic Training**

***"Awesome workshop - a personal road map for inner peace and excellence."***

AM - Science of Mind Practitioner

The Records of the Akashic Records Integration Process have created a very gentle and progressive immersion process to introduce participants to their personal Records. The steps are so simple that by the time the participants actually open their Records, everything easily unfolds.

### **Customized Akashic Training**

Prior to each LIVE Teleseminar Series, I open the Records of the group of participants who will attend that particular Module A. Then I ask the Records of this group for the optimum Integration Processes (or exercises) for this group - the ones that will support all to learn and integrate each step quickly and easily.

Therefore, the Records fine tune exactly what each group receives both in their Manual and during the training, so all can progress gracefully through their learning process. It's always fascinating to see what the Records come up with for each workshop. Their exercises are always SO much better than what I could create!

**What to Expect:** During each Section we

1. Begin by setting up our sacred space.
2. Read and discuss sections of the Module A Manual.
3. Walk through all preparation work step-by-step, asking any questions that arise.
4. Gain a greater understanding of the scope of the Akashic Records and how to use this spiritual resource.
5. Learn about, understand, and use Heart Integration, Prayer of Forgiveness, and Method to Open – all which came directly from the Akashic Records.
6. By Section 3, participants will open, explore, and close their Records several times with the customized Integration Processes.
7. Have ample time to share and to ask questions during each Section.

***"I enjoyed your patience and the safe environment for learning that you create.  
Thank you for an adventurous way to learn to play in our Akashic Records."***

DW - Acutonic Sound Practitioner
